

# Assembling a Bushing Storage Stand

The bushing storage stand is a simple way to keep the reusable bushings from various turning project kits organized and easy to find.

## The kit includes:

- 15 plastic storage tubes with lids
- 4 large (2.5/8") legs
- 4 small (1.3/4") legs
- 8 screws
- 15 labels
- Top and bottom plates of stand

## Instructions:

1. Remove all packaging from kit materials.
2. Select which legs you'd like to use.
3. Align each pre-drilled hole on the top plate of the stand with a leg. Insert the screws into the holes and tighten to attach the legs to the plate.
4. Flip the stand upside down and align the pre-drilled holes in bottom plate with the legs. Insert and tighten the remaining screws.
5. To label the bushing storage tubes, simply peel and stick the adhesive circles to the lids and write the bushing size or style on it.
6. Place the storage tubes into the holes of of the assembled bushing stand.

## Options

- Use longer or shorter legs to make a tall or short stand.
- To create a tilted appearance, put long legs on one side and short on the other.
- To save even more space, mount the stand vertically on the wall.
